The following guidelines for citation of bibliographic and hyperlinks are suggested.

URL and DOI:

1. In all cases, the full name of the journal or book, the volume number, and the page numbers are cited.

2. DOI (digital object identifier) is a code for locating information on the internet. If a DOI exists, it is placed after the last name of the author(s).

3. URL (uniform resource locator) is a web address. It is placed after the DOI.

4. If the web address is too long, it is shortened at the end of the citation.

5. DOI is shortened to its minimal form using tools such as http://shortdoi.org or http://bitly.com/.

Maddox et al., 2016

(E. Paradis, personal communication, August 8, 2019)
MSOME

- A specific study (Suliman, 2018) claims...
- Sampson and Hughes (2020) claim...
- Adams et al. (2019) claim...
- Several studies (Adams et al., 2019; Carraway et al., 2013; Sampson & Hughes, 2020; Suliman, 2018)
- Usage guidelines:

(a) When a product has only one or two authors, it should be cited in all cases where the product is mentioned.

(b) When a product has three or more authors, only the first author should be cited along with et al.

- Acknowledgments:

(Centers for Disease Control and Prevention, 2019, p. 10)

- Examples of referencing:

- Acknowledgment to the original reference:

  (Rabbitt, 1982, as cited in Lyon et al., 2014)

- In the text:

  In a study by Rabbitt (1982), as cited in Lyon et al. (2014),

- In the bibliographic list:
